

OVERVIEW

Captaris Workflow and Microsoft Visio

Captaris Workflow is powered by Teemplate to extend Microsoft Visio functionality and bring Visio process diagrams to life with workflow and business rules automation.

WHY CAPTARIS WORKFLOW?

- **Leverages Existing Processes** - often organizations will use Microsoft Visio to define a business process and determine what a "best practice" is. Captaris Workflow leverages the Microsoft Visio investment and allows the customer to add business rules and actually automate the business process—delivering streamlined effectiveness, efficiency and accountability.
- **ROI and TCO** - delivers measurable Return on Investment (ROI) and a lower Total Cost of Ownership (TCO) compared to other portal solutions.
- **Flexibility** - customers have the option of using powerful wizards to add business rules to any Microsoft Visio defined business process. Migration to the fully Integrated Design Environment (IDE) allows the automation of any business process.
- **Integrate and Extend** - designed to provide "drag-and-drop" integration with Microsoft Visio.

BENEFITS

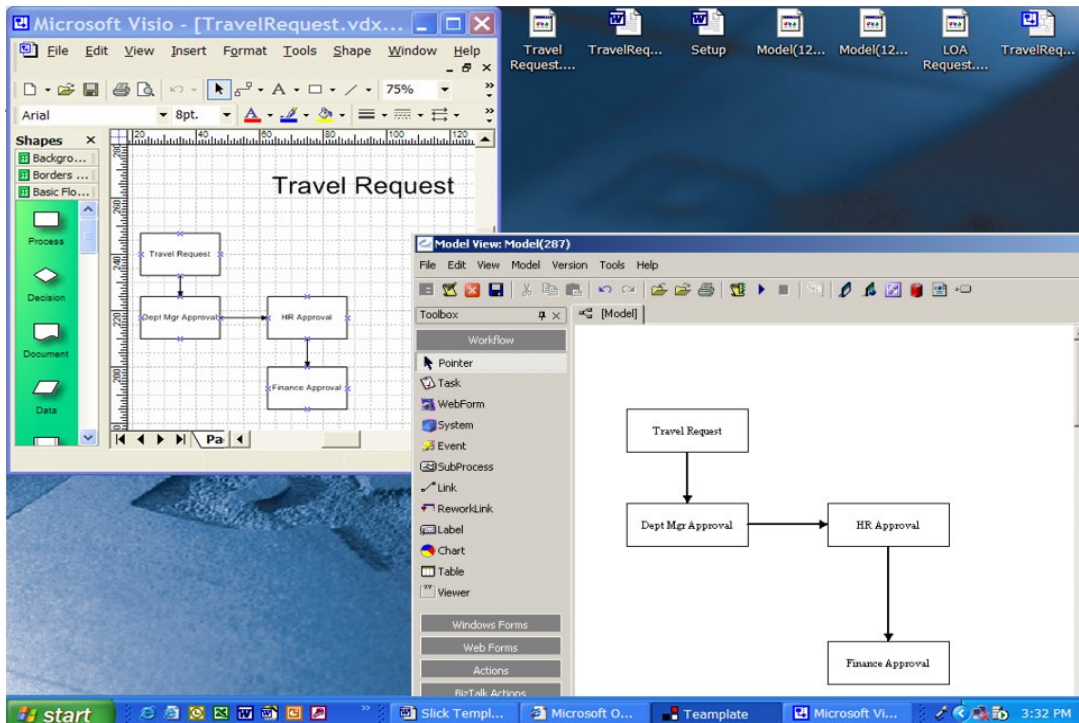

- **Visual Interface** - a Captaris Workflow solution provides a rich "people to people" user interface that is very easy to learn and use. This allows you to take Microsoft Visio processes that were once "binder-ware" or "wall-ware" and turn them into functional applications.
- **Prototypes and Delivering a Business Case** - Captaris Workflow is easy to demonstrate to decision makers and the Captaris Rapid Process Justification can assist you in accurately projecting ROI and in building a full process automation or process improvement business case.
- **Capture Best Practices** - Captaris Workflow allows you to capture best practices and ensures that defined processes are followed.

KEY DIFFERENTIATORS

- **Pure .NET Technology** - developed using Visual Studio .NET, (C#) and XML Web Services.
- **Visio Integration** - Captaris is a Microsoft Visio Partner.
- **Ease-of-use** - Captaris Workflow combines robust functionality with ease-of-use for knowledge workers, designers, managers and system administrators.

FEATURES AND INTEGRATION

- Simply save the existing Microsoft Visio drawing to your desktop as a Microsoft Visio 2002 .vdx file and then drag-and-drop it into a newly created Captaris Workflow model.
- Once the Visio model has been dropped onto the Captaris Workflow canvas, all of the tasks, decisions, documents, etc. are displayed in the Captaris Workflow model. It is then only a matter of refinement of the objects on the canvas and the addition of business rules using Captaris Workflow wizards or the full Integrated Design Environment (IDE).

FOR MORE INFORMATION

Captaris Business Information Delivery solutions help organizations of all sizes automate the information and document flow throughout the information lifecycle (capture, process, archive, deliver). With a comprehensive suite of software and services, Captaris helps organizations to grow revenues and increase profits while meeting compliance goals. Through a global distribution network of leading enterprise technology partners, Captaris has installed more than 90,000 systems in 95 countries in companies of all sizes, including the entire Fortune 100. For more information, visit www.captaris.com or call +1.800.443.0806.
